

WE NEED YOUR INPUT!

Employment after Concussion/Brain Injury Project

Did you know that only 40% of individuals find their way back to work within two years of acquiring a brain injury? Difficulty returning to work after a brain injury can lead to anxiety, depression and financial stress.

OBIA's Return to Work team is developing a program to facilitate the return to work process with survivors and their employers. To understand the experience of returning to work, we are hosting focus groups and we invite you to consider sharing this information with your networks.

We are interested in speaking with the following groups of people regarding the return to work process:

- Survivors of concussion/ brain injury
- Employers
- Survivor's support network

Focus groups will be between 1 and 1.5 hours and will take place in October 2023.

Your network's experience and feedback is a valued asset that will help to improve and shape the return to work process for concussion/brain injury survivors.
